

Client: McDonald's Restaurants Limited

Location: Bath

Duration: 5 weeks

The Design

The 'Alphabet' scheme, focuses on a palette of organic forms, textural patterns, crafted letters and food inspired artwork within a core black and white colour scheme.

Scope of Work

All furniture, fittings, ceiling, and Floor coverings were stripped out of the restaurant, allowing the design to take its shape. Some existing walls were demolished and new built, with alterations made to the steel work at the entrance of the building including new piled foundations. Alterations were made to the drainage and HVAC to accommodate a new kitchen layout. Customer toilets were refurbished and the disabled toilet relocated. New floor and wall tiling, in line with the scheme, along with a new suspended and plasterboard ceiling were installed and the restaurant was fitted out with all new furniture and fittings.
